

Pathophysiology practicals
2018/2019. Year 5th semester

(135 min w/o break)
(Tuesday, Thursday, Friday)

| Week | Date | Topic |
|-------------|-----------------------|---|
| 1. | Sept. 10, 11, 13, 14. | Normal electrocardiogram |
| 2. | Sept. 17, 18, 20, 21. | Arrhythmias 1: disorders of impulse generation |
| 3. | Sept. 24, 25, 27, 28. | Arrhythmias 2: disorders of impulse conduction |
| 4. | Oct. 1, 2, 4, 5. | Diagnosis of ischemic heart disease and myocardial infarction |
| 5. | Oct. 8, 9, 11, 12. | ECG abnormalities of cardiac hypertrophy and electrolyte disorders. |
| 6. | Oct. 15, 16, 18, 19. | Multiple abnormalities of ECG. Practice |
| 7. | Oct. –, –, 25, 26. | Diagnostic methods of GI diseases |
| 8. | Oct. 29, 30, –, – | Diagnostic methods of GI diseases |
| 9. | Nov. 5, 6, 8, 9. | <i>Midterm (ECG)</i> |
| 10. | Nov. 12, 13, 15, 16. | Evaluation of alterations in hepatobiliary diseases |
| 11. | Nov. 19, 20, 22, 23. | Diagnostic evaluation of kidney diseases |
| 12. | Nov. 26, 27, 29, 30. | Differential diagnosis of fluid and electrolyte disorders |
| 13. | Dec. 3, 4, 6, 7. | Pathophysiology of acid-base disorders |
| 14. | Dec. 10, 11, 13, 14. | Evaluation of lung diseases |

Lecture: Time: Friday 9⁵⁰–11⁰⁰; **Location:** NET, Green auditorium
